

Manage HR Skills

Lab 03

⌚ 10-15m

Lab Objectives

You will achieve the following objectives:

- Create New HR Skill
- Add Skill to Individual
- Add Skill to Group

Scenario

Now that the Employee Relocation group has been created, you will add a Skill to the group. Remember, Skills may be used by the system when automatically assigning HR Cases. In this lab, you will utilize the Manage HR Skills module to create a new Skill and grant the Skill to an individual. Then, you will grant the Skill to an entire group so that all group members automatically inherit it.

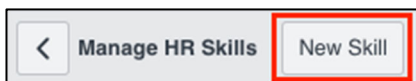

Lab Dependency: This lab utilizes the HR Group created in the previous lab. You will need to complete those steps for this lab to succeed.

A. Create New HR Skill

1. You should be impersonating **HR Admin**. If not, log in as the System Administrator [admin] using the credentials provided to you, then impersonate **HR Admin**.
2. **HR Administration > Manage Roles > Manage HR Skills**.
3. Search the **All Users** list for **Sandy Propsom**. How many Skills does Sandy have? ____.

Knowledge Check: Sandy has 0 Skills.

4. Click the **X** in the search field to remove the search.
5. At the top of the Manage HR Skills page, click the **New Skill** button:

6. Complete the form as follows:
 - a) Skill: **Relocation Specialists**
 - b) Description: **HR Professionals responsible for employee relocation activities**
7. **Submit.**

B. Add Skill to Individual HR Professional

Using the Manage HR Skills module, skills may be granted directly to HR professionals. In most cases, it is recommended that Skills be granted to groups. However, some skills, like languages, may only be applicable to a few members of a group and should be assigned directly to individuals.

1. Click the **Spanish Language** Skill from the All Skills list, then click the **Assign/Remove Users** button.
2. Follow these steps to assign the Skill to **Rosalie Krigger**:
 - a) Begin typing '**rosalie**' in the filter box to filter the list
 - b) **Click the card** to select Rosalie. The card will turn green.
 - c) Click **Save**.
3. Click the Skills dropdown on Rosalie's card and review the skills that have been assigned or granted to her.
4. Click the box to deselect the Leave of Absence skill. This removes the skill from her record.

C. Add Skill to Group

Another option is to assign a Skill to a group. When a Skill is assigned to a group, all group members automatically inherit it. Also, when a member is removed from a group, the Skill will automatically be removed from their record. Follow these steps to add the Relocation Specialists Skill to the Employee Relocations group.

1. **HR Administration > Manage Roles > Manage HR Groups.**
2. Select **Employee Relocation**.

3. Click the **Skills** related list.

Knowledge Check: Observe that the HR skill is already listed. It was inherited from the parent HR group along with the `sn_hr_core.basic` role, found on the Roles related list.

4. Click **Edit...** on the Skills related list.
5. Add **Relocation Specialists** to the **Skills List**, then click **Save**.

Lab Verification

1. On the **Group Members** related list, select **Reyna Bangle** to open her User record.
2. Select the **Skills** related list and observe that she has been granted the Relocation Specialist Skill.

Note: The *Inherited* column shows “true” for Skills that were granted automatically by group memberships and “false” for Skills that were granted manually. Because some of Reyna’s Skills were granted manually, they would need to be manually removed from her record if she changed jobs.

3. **HR Administration > Manage Roles > Manage HR Skills.**
4. Select the **Relocation Specialists** Skill from the All Skills list.
5. Observe that all Employee Relocation group members are now listed on the right which means they have been granted the Skill.

Congratulations!!

By completing this lab, you have created a new HR Skill and assigned that Skill to an individual and to a group.
