

Configure HR Service and Case Template

Lab 04

⌚ 20-25m

Lab Objectives

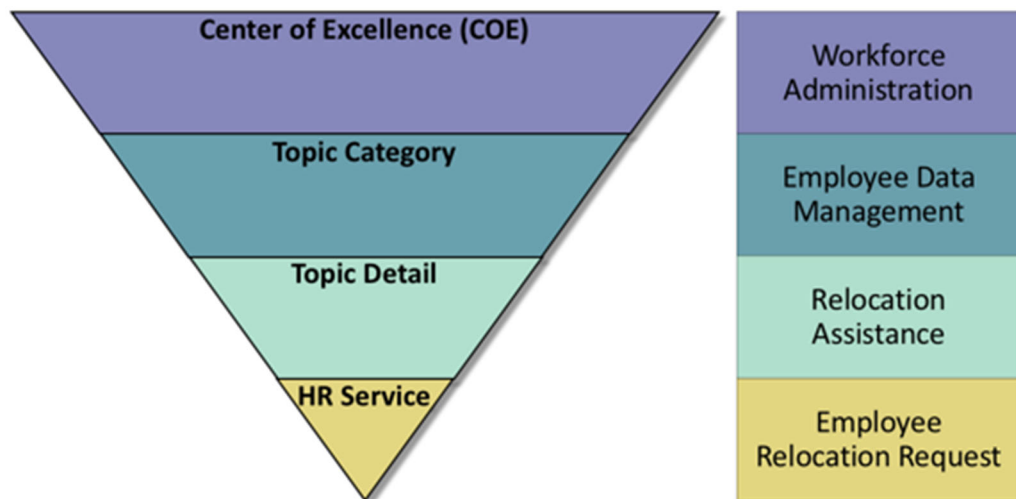

You will achieve the following objectives:

- Create a new HR Service for Employee Relocation requests
- Create a new HR Case Template based on the new HR Service

Scenario

Now that Cloud Dimensions is allowing employees to request relocations, a new HR Service is needed. You have been tasked with configuring the new HR Service and aligning it with an HR Template that will populate the details on the HR Case form.

Requirements:

Lab Dependency: This lab utilizes the Group and Skills created in previous labs. For this lab to succeed, you must first create the Group and Skills from those labs.

A. Create a New HR Service

1. You should be impersonating **HR Admin**. If not, log in as the System Administrator **[admin]** using the credentials provided to you, then impersonate **HR Admin**.
2. **HR Administration > HR Services > Topic Categories**.

Knowledge Check: From the **HR Topic Categories** list, observe that each **Topic Category** is associated with a COE. Remember, the COE is the table the HR Case will be saved on.

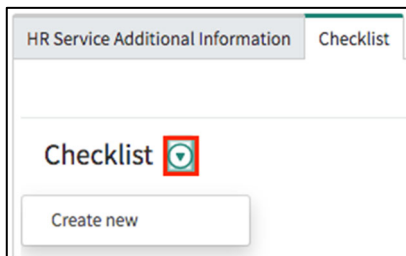

3. What **COE** is the **Employee Data Management** Topic Category associated with?

4. Click to open the **Employee Data Management** Topic Category.
5. How many **Topic Details** are associated with this Topic Category? _____
6. Select the **Relocation Assistance** Topic Detail.
7. What HR Services does it have? _____

The new HR Service you have been asked to create fits into this categorization, so now you will add a new HR Service to the Relocation Assistance Topic Detail.

8. Click **New** on the **HR Services** related list to create a new HR Service for the Employee Relocation Request.
9. Complete the form as follows:
 - a) HR service name: **CD Employee Relocation Request**
 - b) Value: <<automatically populates after the name is entered>>
 - c) Show case to subject person: <<checked by default>>
 - d) Opened for / Approver view: **Default for opened for/approver**
 - e) Subject person / Task assignee view: **Default for subject person/task assigned to**
 - f) Description: **Request a relocation to another Cloud Dimensions office**
10. **Save**.

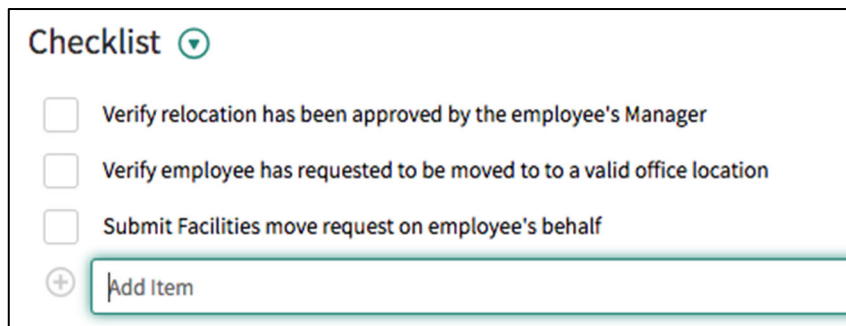

11. In the Checklist section, click the arrow next to **Checklist**, then select **Create new**:

12. Add the following **Checklist items**

Note: Click enter to save and move to the next checklist item:

- a) **Verify relocation has been approved by the employee's Manager**
- b) **Verify employee has requested to be moved to a valid office location**
- c) **Submit Facilities move Request on employee's behalf**

13. **Update.**

Knowledge Check: Observe the new Employee Relocation Request HR Service is now aligned with the Relocation Assistance Topic Detail, the Employee Data Management Topic Category, and the HR Workforce Administration Case COE.

B. Create a New HR Case Template

Next, you will create an HR template that will be used to complete fields on the HR case form. Then, you will associate the HR Template to the new HR Service.

1. **HR Administration > HR Services > HR Templates.**

2. Search the Table field for the name “*work.” Remember, the HR Service you created is on the **HR Workforce Administration Cases** [sn_hr_core_case_workforce_admin] table.

Note: Observe that the table field in this list shows both the nickname and the table name. In some cases, the table name is not the same as its nickname. When searching this field, you must search for keywords that are in the table name.

For example, if you wanted to search for the HRIT Operations Case [sn_hr_core_case_operations] table, you would search for the word “operations” because “HRIT” is not part of the table name.

3. Open the **Request Relocation Assistance** HR Template and review the form fields.
4. Click the **Back button** to return to the HR Templates list where you can create a new HR Template.
5. **New.**
6. Complete the form as follows:
 - a) Name: **CD Employee Relocation Template**
 - b) Table: **HR Workforce Administration Case** [sn_hr_core_case_workforce_admin]
 - c) Owning Group: **Employee Relocation**
7. Select **Save** from the form context menu to save the Template and open the more-user-friendly HR Case Template configuration view.

Note: Either UI works for this configuration, but the new UI simplifies configuration by presenting you with radio buttons to select configuration elements instead of dot walking to various fields.

8. Continue completing the form as follows:
 - d) Short Description: **Employee relocation request**
 - e) Priority: **4 – Low**
9. In the **Assignment type** section, select the radio button by **Skills/Assignment group**.

Note: This allows you to select the Skills or a specific Assignment Group for this type of Case.

10. Click the lock to expand the **Skills** field, then select **Relocation Specialists**:

The screenshot shows the 'HR Case Template' form. At the top, there are buttons for 'Switch to Classic UI', 'Save', and 'Update'. The form fields include: 'Name' (CD Employee Relocation), 'Active' (checked), 'COE' (HR Workforce Administration Case [sn_hr_core_case_workforce]), 'Short Description' (Cloud Dimensions employee relocation request), and 'Priority' (4 - Low). Under 'Assignment type', 'Skills/Assignment group' is selected. The 'Skills' field is expanded, showing a list with 'Relocation Specialists' selected. There are 'X' and 'lock' icons next to the list. Below the list is a 'Select a record' dropdown. At the bottom, there is an 'Assignment Group' dropdown with 'Select group'.

11. **Update.**

Now that the HR Template has been created, you will associate it with the Employee Relocation Request HR Service.

12. **HR Administration > HR Services > HR Service Configuration.**

13. Open the **CD Employee Relocation Request** HR Service created earlier.

14. In the **Template** field, begin typing '**cd employee**' then select **CD Employee Relocation Template** from the filtered list.

15. **Update.**

Lab Verification

Test the functionality of the new HR Service by creating a new HR Case.

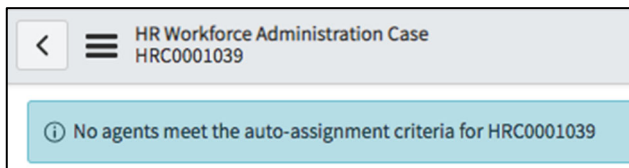

1. **HR Case Management > Create New Case.**

2. Complete the form as follows:

a) Search for Employee: **Abel Tuter**

b) HR Service: **CD Employee Relocation Request**

3. **Create Case.**
4. Observe that the HR Case has been automatically populated with the **Skills, Short Description**, and **Priority** you identified on the HR Template.
5. Click the **Ready for Work** button.
6. **Observe the message** that no agents meet the auto-assignment criteria:

Knowledge Check: On the HR Template for this HR Service, you did not select an Assignment Group. When no Assignment Group is assigned, the baseline Routing and Assignment rules automatically assigned the Case to the HR Tier 1 group.

The Relocation Specialists Skill has not been granted to the HR Tier 1 group; therefore, no agents can be automatically assigned.

You have several choices:

- Add the Relocation Specialists Skill to the HR Tier 1 group.
- Grant the Relocation Specialists Skill to specific members of the HR Tier 1 group.
- Create a new Assignment Rule for this type of Case.
- Add the Employee Relocation Assignment Group to the HR Template.

For this lab, you will add the Employee Relocation Assignment Group to the HR Template.

7. **HR Administration > HR Services > HR Templates.**
8. Select the **CD Employee Relocation Template** HR Case Template.
9. In the Assignment type section, select:

Assignment Group: **Employee Relocation**
10. **Update.**
11. **HR Case Management > Create New Case.**
12. Complete the form as follows:
 - a) Search for Employee: **Abel Tuter**
 - b) HR Service: **CD Employee Relocation Request**

13. Create Case.

Knowledge Check: Observe that the HR Case has been automatically populated with the **Skills, Short Description, Priority, and Assignment group** you identified on the HR Template.

14. Click the **Ready for Work** button.

15. Observe that the Case was automatically assigned to a member of the Employee Relocation Group.

16. To whom was it assigned? _____

Knowledge Check: Observe that the **Checklist** you defined on the HR Service record is displayed in the Fulfillment Instructions section.

**** CHALLENGE ** – Add Fulfillment Instructions**

Fulfillment instructions are instructions that may be added to the HR Case to help the HR Professional resolve it. Fulfillment instructions are contained in their own module to allow different instructions to be displayed based on the conditions of the Case.

Cloud Dimensions offers Tuition Reimbursement to Cloud Dimensions employees that is different than what is offered to subsidiaries. The base platform already has Fulfillment instructions for Tuition Reimbursement Inquiries that may be used to subsidiaries, but a new Fulfillment instructions record is needed for Cloud Dimensions employees only.

1. **HR Administration > HR Services > HR Fulfillment Instructions.**

2. Search for and open the **Tuition Reimbursement Inquiry** HR Fulfillment Instructions record.

Note: Because Cloud Dimensions offers different policies based on the employee's Company, you will edit this record and then create a new one for Cloud Dimensions employees.

3. Update the record as follows:

a) Condition: << add the following condition >>

[AND]

Company | is not | Cloud Dimensions

4. Select **Save** from the form context menu.

Now, you will use this record as the basis for your new HR Fulfillment Instruction for Cloud Dimensions employees.

5. Change the Name to **CD Tuition Reimbursement Inquiry**.
6. Select **Insert and Stay** from the form context menu.
7. Update the form as follows:
 - a) Condition: << update the following condition >>
Company | is | Cloud Dimensions
8. Replace the Instructions with any text. For example: **Cloud Dimensions will reimburse the employee for up to \$2,500 each semester for continuing education.**
9. **Remove the associated Knowledge article** by expanding the field, clicking on the article number, then clicking the X.
10. **Update.**
11. **HR Case Management > Create New Case.**
12. Complete the form as follows:
 - a) Search for Employee: **Alene Rabeck** – Alene does not work for Cloud Dimensions.
 - b) HR Service: **Tuition Reimbursement Inquiry**
13. **Create Case.**
14. Scroll down and review the **Fulfillment Instructions**.

Knowledge Check: Observe that the Fulfillment instructions are for the original Tuition Reimbursement Inquiry record and not the new one you created for Cloud Dimensions.
15. Create another **Tuition Reimbursement Inquiry** Case using **Sandy Propsom** as the Subject person. Sandy is a Cloud Dimensions employee; therefore, the newly created Fulfillment instructions will be displayed on the Case.

Congratulations!!

In this lab, you created a new HR Service and its associated HR Template. Remember, HR Cases are used by HR professionals to interact with an employee and the HR Template associated with the HR Service completes specific fields on the HR case form.
